Noventiq's Streamlined 3-Step Rapid Migration Approach

Unlock Efficiency and Speed Your Time to Market with a Trusted Framework

Assessment

It starts with a thorough assessment (AWS Rapid Discovery, Pre-MAP Accelerators, TCO Report) of your current infrastructure to identify potential challenges, such as skills gaps in your team. Additionally, we help your team with workshops and trainings to prepare for the migration.

Mobilization

We mobilize resources to address all gaps and ensure a smooth transition with AWS best practices. We prepare you to be migration-ready by establishing a foundational Landing Zone Configuration to deploy a secure and well-configured framework for your cloud infrastructure.

Migration

The migration phase prioritizes data security by leveraging a well-defined cloud migration strategy (AWS Migration Hub). This ensures a smooth transition to AWS Cloud and sets the stage for future modernization of your apps and technology.

Are you bogged down by legacy IT?
Are you looking for a predictable and personalized move to AWS?

With RMO, get up and running on AWS with fixed-cost, end-to-end rehosting and re-platforming migration.

- Private cloud (VMware/Nutanix/HyperV)
- Public cloud (GCP, Azure)
- Physical servers
